

THREE **EXTRA** WAYS TO SHARE YOUR THOUGHTS!

Did you miss our April 12th community workshop? You can still share your feedback on development concepts for the Global Mall study area!

The Global Mall Study is a nine-month process to develop a master plan that builds on community ideas and discussions to guide future development in the Global Mall area. Through the study, the community will establish a vision to transform the area through land use, transportation, open space, and community design decisions that will positively shape the future of the neighborhood.
